

Take a Proactive Approach to Disease Management

Canada's canola and soybean crops are at risk from yield-robbing diseases.

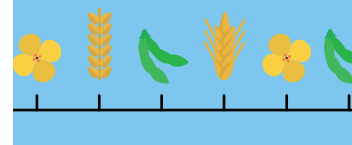

Acapela™ is a Group 11 fungicide that controls sclerotinia and white mould.

One-of-a kind fungicide

Great rotational option

Acapela™ quickly and efficiently surrounds, penetrates and protects the leaf and stem.

Rapidly absorbed for complete coverage

Better coverage = Better protection

Acapela™ is the perfect disease control strategy.
