### Insects

- Apple chewing moth
- Apple maggot
- Apple rust mites
- Brown marmorated stink bug
- Clearwing moth
- Codling moth
- Dogwood borer
- European apple sawfly
- European leafroller
- European red mites
- Eye-spotted budmoth
- Fruittree leafroller
- Green apple aphid
- Mullen bug
- Oblique-banded leafroller
- Oriental fruit moth
- Plum curculio
- Root-lesion nematodes, foliar treatment
- Root-lesion nematodes, soil drench treatment
- Rosy apple aphid
- San Jose scale
- Spirea aphid
- Spotted tentiform leafminer
- Tarnished plant bug
- Three-lined leafroller
- Two spotted spider mites
- Western tentiform leafminer
- White apple leafhopper
- Winter moth
- Woolly apple aphid

### Diseases

- Apple scab
- Cedar apple rust
- Powdery mildew
- Quince rust

### Weeds

- Annual and perennial weeds
- Annual grasses
- Quackgrass
- Vetch

---

* Suppression; ** Control.

Always read the label for rates, instructions and precautions. Please call the Solutions Center at 1-800-667-3852 or visit corteva.ca for more information.
Why use Delegate™?

• Performance. Delegate controls a broad spectrum of insects in apples two ways – by contact and ingestion – for quick knockdown and residual activity.

• Resistance management. Delegate contains a unique Group 5 active ingredient, making it an excellent tool in most IPM programs.

• Ease of use. Low use rates delivered through a convenient dry formulation.

• Minimize flare-ups. Maintains most populations of beneficial insects; does not flare mites.
Why use Intrepid™?

• Safe to beneficials. May be applied at bloom without disrupting any beneficial insects, including bees, when used according to label directions.
• Excellent environmental profile. High level of safety to humans, bees, mammals, birds, aquatic organisms and groundwater.
• Novel Group 18 insecticide that controls lepidoptera by initiating lethal premature molting in both ovicidal and larvidical life stages, causing feeding cessation within 24 hours.
• Residual control. Provides residual control for 10 to 14 days after application.

Intrepid™
INSECTICIDE

Group 18

Visit us at corteva.ca
Why use Closer™?

• Delivers super fast knockdown and residual control of sap-feeding pests including aphids and San Jose scale while minimizing flare-ups.
• Provides control of woolly apple aphid when applied in combination with an approved adjuvant.
• A unique Group 4C insecticide that is effective on insect populations resistant to other chemistries.
• Good fit in an IPM program.

Closer™
Isoclast™ active
INSECTICIDE
Group 4C
Why use Entrust™?

• Naturalyte™ insecticide with broad pest control for organic growers.
• Highly selective on target pests, increasing safety to beneficial insects.
• Highly active at low use rates.
• Controls a broad spectrum of insects in apples two ways – by contact and ingestion – for quick knockdown and residual activity.
• Low toxicity to beneficials allows it to be used in IPM programs that rely on beneficials for control.
Other excellent products for apples

**GF-120™**
FRUIT FLY BAIT

- Excellent apple maggot control.

**Lannate™**
INSECTICIDE

- Broad-spectrum insect control on a wide range of crops.

**Success™**
INSECTICIDE

- Cost-effective clearwing moth control.

**Dithane™ DG**
Rainshield™ NT
FUNGICIDE

- The world’s most trusted protectant fungicide.

**Fontelis™**
FUNGICIDE

- Powerful, flexible disease management.

**Nova™**
FUNGICIDE

- Proven powdery mildew control.
