## Why use Closer™ insecticide?

- Extremely fast-acting control of black cherry aphid
- No cross-resistance with other insecticides
- Good fit in an IPM program
- Low use rate with superior control
- Unique class of chemistry – Sulfoximines
- Can be used around beneficial populations when used according to the product label
- Extended residual activity
- Controls by both contact and ingestion
- Xylem systemic – product moves to the growing tips of the plant

GROUP 4C  
**Closer™**  
 Isoclast™ active  
 INSECTICIDE
