

**NUTRIENT EFFICIENCY  
BIOSTIMULANT**

## 2022 Introductory Offer

Utrisha™ N provides crops a unique way to capture nitrogen throughout the season, helping plants reach their yield potential.

### What is Utrisha N?

Utrisha N is a nutrient efficiency biostimulant. The natural bacteria, *methylobacterium symbioticum*, **fixes nitrogen from the air and converts it into a usable form for the plant.**

Utrisha N provides a sustainable, alternative source of nitrogen that reduces dependency of nitrogen uptake from the soil and ensures the **plant has access to nitrogen all season long**, without the risk of leaching into water tables or releasing additional greenhouse gases.

2021 Field Trial – Lenore, MB

**And now, you can receive \$1/acre savings on Utrisha N.**

**Try a minimum of  
120 acres of Utrisha N**

**\$1.00/acre**

Eligible program period: September 1, 2021 – August 31, 2022. Acres are calculated using registered application rates. Sales need to be reported to AgCollect by your retailer. Rebate cheque will be mailed directly to grower. Authorizations are required to participate. Always read and follow label directions.
