

LEAFY VEGETABLE

PEST TIMING CALENDAR

Corteva Agriscience™ offers an outstanding lineup of customer-focused products for leafy vegetable growers that fit well into an Integrated Pest Management (IPM) program.

Delegate™

Jemvelva™ active

INSECTICIDE

Delegate™ insecticide with Jemvelva™ active (spinetoram) is a naturally-derived product that is fast-acting against cabbage looper, diamondback moth and imported cabbage worm. Its unique mode of action provides a strong rotational partner in IPM programs.

Entrust™

Qalcova™ active

INSECTICIDE

Entrust™ insecticide with Qalcova™ active (spinosad) is a proven natural insecticide for organic leafy vegetable growers. Entrust provides excellent activity on cabbage looper, diamondback moth and imported cabbage worm. It is also registered for use in greenhouse lettuce applications.

Closer™

Isoclast™ active

INSECTICIDE

Closer™ insecticide with Isoclast™ active is ideal for controlling aphids and tarnished plant bugs in your leafy vegetable crops. It moves quickly through the plant to control pests through both contact and ingestion.

Fontelis™

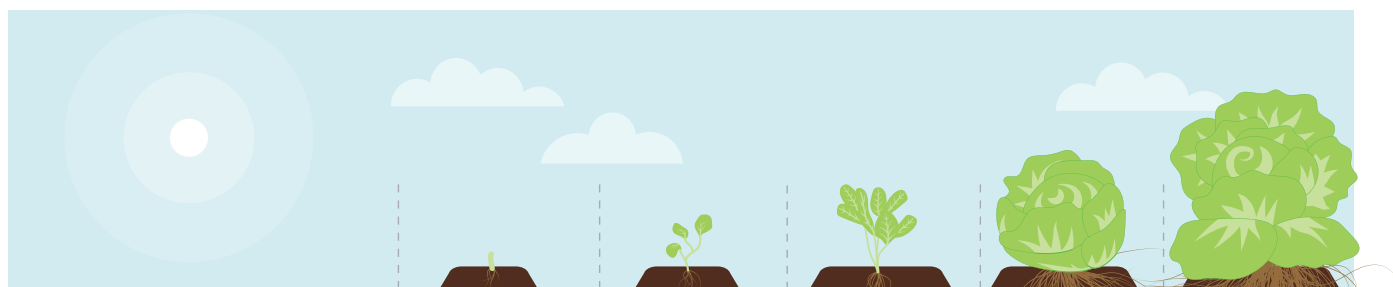

FUNGICIDE

Fontelis™ fungicide provides residual, preventative and post-infection activity on a broad spectrum of diseases in leafy vegetable crops including gray mold, powdery mildew and septoria late blight. With both translaminar and systemic protection, Fontelis redistributes to protect both treated and untreated parts of the plant.

PRE-HARVEST INTERVALS IN LEAFY VEGETABLES

(Refer to each product label for crop specific pre-harvest intervals)

Closer™ insecticide	3 days	Delegate™ insecticide	1 day	Entrust™ insecticide	1-3 days
Intrepid™ insecticide	1 day	Success™ insecticide with Qalcova™ active	1-3 days	Fontelis™ fungicide	3 days
		Kerb™ SC herbicide	55 days
