

# Utrisha™ N

NUTRIENT EFFICIENCY  
BIOSTIMULANT

## How to store, handle and apply

Utrisha™ N is a nutrient efficiency biostimulant, containing a natural nitrogen-fixing microbial strain. It contains a living organism and must be stored properly to ensure optimal product performance for your customers. When stored correctly, Utrisha N can be stored for more than a year.

### Storing Utrisha N

#### DO

- Store cases in well-ventilated area at room temperature.
- Keep in sealed bags until ready to use.
- Store product at room temperature to maximize product shelf life.

#### DON'T

- Do not store where temperatures will exceed 30°C.
- Do not store in direct sunlight and avoid freeze-thaw conditions.

Before use and for complete product information, please read and follow label directions.

## Applying Utrisha N:

- Utrisha N is a wettable powder that easily dissolves into solution.
- Utrisha N is rainfast 1 hour after application.
- Apply to healthy, growing crops with sufficient plant biomass.
- For best results, apply in early morning when leaf stomata are open.
- Once Utrisha N is added to the spray tank, apply as soon as possible. If you are adding an approved tank-mix, apply mixture within 2 hours.
- Refer to Corteva Supported Tank-Mix list for approved Utrisha N tank-mixes.

Before use and for complete product information, please read and follow label directions.

## Application Information

<b>Canola</b>	4 leaf-bolting (before stem elongation)
<b>Cereals</b>	4 leaf-jointing (avoid winter dormancy in winter wheat)
<b>Corn</b>	V4-V8
<b>Soybeans</b>	V4-V8
