

Cerefit™

FUNGICIDE

Cerefit™ is a new dual mode of action fungicide developed to be applied at Flag Leaf Timing to protect your high yielding Barley and Oat crops from yield-limiting leaf diseases.

Cerefit provides broad-spectrum control of leaf diseases in barley, oats and wheat, such as Net Blotch, Leaf Rust, Stripe Rust, Stem Rust, Crown Rust, Powdery Mildew, Septoria, Scald and Spot Blotch. The multiple modes of action in Cerefit provide a unique combination of 2 active ingredients (Group 11 and 3) each contributing to excellent disease control and resistance management. Cerefit also provides increased flexibility through its wide window of application.

Active ingredient	Group 11 (picoxystrobin) & Group 3 (propiconazole)
Rainfast	1 hour
Rate	1 case (5.3L + 3.5L) treats 40 acres
Crops Registered	<ul style="list-style-type: none">• Barley• Oats• Wheat (Winter, Spring, Durum)
Crop Stage	To maximize yields in cereals, it is important to protect the flag leaf from foliar diseases. For optimizing yield and flag leaf disease control, apply Cerefit at Feeke's 9, 'flag leaf out'.
