Optimize the Genetic Potential of Every Plant in Your Field

Fortified Stimulate™ Yield Enhancer contains a combination of critical plant growth hormones, strategically formulated to enhance root development, boost plant growth, and maximize yields.

Strategically formulated to ignite robust plant growth and optimize yield, Fortified Stimulate Yield Enhancer contains a patented formulation of four critical plant growth hormones – Cytokinin, Gibberellic acid (GA), and Auxins (IBA and IAA). Fortified Stimulate Yield Enhancer increases the levels of these naturally occurring hormones, improving the plants growth potential, and optimizing essential plant functions. As a result, the solution accelerates root development, promotes bigger and more robust plants that will be more resilient to stress – increasing yield potential and plant productivity.
