EXCELLENT HERBICIDES FOR VEGETABLES

DuPont® Assure II XR
For grassy weed control in beans, rutabagas, sugar beets and sunflowers

Goal™ 2XL
Broadleaf weed control in dry bulb onion, broccoli, cabbage and calfflower

Kerb® sc
Annual grass and broadleaf control in lettuce

Lontrel® 380 SC
The standard for thistle control in Brassica (cole) leafy vegetables and rutabaga

Lontrel® XC HERBICIDE

EXCELLENT FUNGICIDES FOR VEGETABLES

DuPont® Fontelis®
Powerful, flexible disease management for vegetable crops

DuPont® Tanos®
Post-infection and kick-back activity against late blight and control of late blight stem infections

Proven control of powdery mildew in cucurbit vegetables (crop Group 9), greenhouse tomato, cucumber and peppers as well as control of rust in dry beans and asparagus

For powdery mildew control in melons, pumpkin, squash and lettuce

EXCELLENT INSECTICIDES FOR VEGETABLES

Closer® MEC
Extremely fast knockdown of sap-feeding insects in vegetables

DuPont™ Lannate® suspicide
Broad-spectrum insect control on a wide range of crops
**WHY USE DELEGATE OR SUCCESS?**

- Excellent control of a broad range of insects in a wide range of crops
- Unique mode of action provides smart rotational options
- Works two ways – on contact and by ingestion – for quick knockdown and residual activity

**WHY USE ENTRUST?**

- Trusted and proven insect control for organic operations
- Fast-acting control because it works by both contact and ingestion
- Registered for a broad range of crops and pests

**WHY USE INTRIPED?**

- Induces premature molt – ovicidal and larvicidal activity
- Safe to beneficials when used according to label directions
- Unique mode of action and a valuable tool in any IPM program

### VEGETABLE GROWER PRODUCT GUIDE
